PROJECTS

iRewardify - Ecommerce Website (02/2024 - Present) (02/2024 - Present)

- **Description:** Built a MERN stack Gift Card E-commerce website with Node.js, MongoDB, and Express.js for the back end and React.js for the front-end. Admin dashboard enabled comprehensive management of cart, products, customers, and orders. Facilitated purchase of digital and physical gift cards from top brands, offering personalized options and secure transactions.
- **Key Features:** User-friendly interface for a streamlined gift-buying experience. Personalized options for customized gifts. Secure transactions and dynamic features like themed designs and scheduled delivery. Hassle-free shopping with convenient features. Robust backend system providing insights for merchants to showcase products via branded gift cards.
- **Role:** Backend Developer
- **Technologies Used:** Node.js, Express.js, MongoDB, JavaScript, React.js etc.
- **Outcome:** iRewardify bridges the gap between individuals and businesses, offering convenience, style, and joy in the gift-giving experience.

Guardian Banking Solutions - Revolutionizing Bank Client Interaction (06/2023 - 01/2024)

- **Overview:** MERN stack project focused on revolutionizing bank client interaction. Utilized Node.js, MongoDB, Express.js, and JavaScript.
- **Key Features:** Streamlined application process via dedicated operators. Intelligent matching algorithm for personalized quotes, reducing approval time. Promotes transparency, fostering trust between banks and clients. Optimizes banking experience for efficiency and simplicity.
- **Technologies Used:** Node.js, Express.js, MongoDB, JavaScript, React.js etc.
- **Role:** Backend Developer
- **Mission:** To optimize the banking experience, empower financial institutions, and enhance the financial ecosystem.
